

## Video Patch Panels and Accessories HDTV Video Jackfields

Designed to meet the requirements of High Definition up to SMPTE 424M (HDTV) and Serial Digital (SDV) but also suitable for Analogue television, bes has redesigned the range of video jackfields to include performance up to 3 Gbit/s, and new metalwork including a clip-on designation strip. To achieve this performance an appropriately rated BNC and cable must be used.

Sockets are mounted in injection moulded blocks to provide slight movement for easy alignment of connectors and complete isolation of connectors. Milled aluminium extruded front panel for rigid construction and good appearance.

Improved designation strips maximising visible area of paper, and clip-on clear plastic retaining covers for ease of assembly.

Lacing bar at rear.

Standard finish: Storm Grey powder coat for excellent finish and robustness

Dawn Grey or Black available as an option, please ask for details

### Specification

#### Electrical

DC to 3GHz			
Contact resistance	Inner conductor	≤5mΩ	Outer conductor ≤3mΩ
Insulation resistance		≥10GΩ	
Voltage proof		1 KVeff/50HZ	
Impedance		75 Ω	
Return loss		>20dB/3GHz+	
Insertion loss		≤0.3dB/3GHz	

#### Mechanical

Mating cycles	≥5000
Force to engage:	U-link ≤30 N
Straight plug	≥12 N

#### Thermal and Climatic Characteristics

(According to DIN IEC 68-1 40/155/21)  
Storage and operating temperature -40C up to +65C  
Moisture resistance according to MIL spec. 202
